

## Intelligent Data Logging Solutions

# DeMobile5 for your dataTaker data logger

DeMobile5 takes advantage of the power and flexibility of the new generation of mobile devices. Targeted at Pocket PC2003, it gives easy control of the dataTaker DT500 Range of data loggers in situations where desktops and laptops are not suitable or when access to the data logger is restricted.

## Feature Packed... But Simple

DeMobile5 software for use with the new Personal Digital Assistants (PDA) using Microsoft's® Pocket PC2003 operating system. Whether used on its own or in conjunction with Datataker's DeLogger Pro software, it provides a powerful tool to program, monitor and unload data from your DT5/6xx Range dataTaker.

The interface is designed specifically for the Pocket PC2003 and the resolution of the current generation of PDA devices. The screen layouts are optimised for the available view without sacrificing functionality or ease of use.

Large amounts of data can be downloaded to the PDA's internal memory or unlimited storage using Compact Flash or Smart Media plug-in cards. The data can be transferred to a laptop or desktop using wireless or wired connections and displayed directly within DeLogger Pro or converted for use with spreadsheets such as Microsoft® Excel.

## User Interface

- Designed for PC2003
- Touch screen control
- Check box selection changes
- Tabbed interface for cleaner look
- Short cut for common functions
- Functionally logical layout
- Intuitive design

Meter Screen

Simple Unload

## Requirements

- PDA with Pocket PC2003
- dataTaker DT5/6xx Range
- Serial cable adapter (optional)
- BlueTooth™ adapter (optional)
- InfraRed adapter (optional)

## Connection Types

- Direct RS232
- BlueTooth™
- InfraRed

Main DeMobile5 Screen

## Powerful, Portable and Easy To Use

- Program data logger
- Control data logger
- Monitor Status
- Monitor Data
- Download Data
- Manage data logger Memory Card
- View data directly in DeLogger
